COMPUTER APPLICATIONS FOR BUSINESS

A Note to the Reader

Dear Reader,

Your examination preparation is incomplete without practice. Understanding concepts is important, but testing your knowledge helps you identify gaps, improve accuracy, and build confidence.

This Practice Handbook brings together important questions from all five courses prescribed for your BBA 1st Semester End-Term Examinations. These are questions we believe every student should attempt before entering the examination hall.

The handbook is designed to help you revise key concepts, assess your understanding, and become familiar with examination-oriented questions.

A special thank-you to our academic toppers for their valuable feedback and contributions in preparing these resources.

Practise with purpose. Learn from your mistakes. Enter the examination with confidence.

50-QUESTION PRACTICE SET

25 Multiple Choice Questions · 25 Multiple Selection Questions

INSTRUCTIONS

Multiple Choice Questions: Select one correct option for each question.

Multiple Selection Questions: Select all correct options. A question may have more than one correct answer.

Multiple Selection Question marking:

1. One correct option + one wrong option selected: **No marks.**
2. Only one correct option selected, without selecting any incorrect option: **Partial marks.**
3. All correct options selected: **Full marks.**
4. Even if one incorrect option is selected: **Zero marks.**

SECTION A · MULTIPLE CHOICE QUESTIONS

Q01 · Multiple Choice Questions | 1 practice mark

A sales worksheet contains product codes in one column and product names in another. Which function can look up a code and return the matching product name from a separate return array?

A. XLOOKUP

B. TEXTJOIN

C. SUBTOTAL

D. DATEDIF

Answer: (A)

Q02 · Multiple Choice Questions | 1 practice mark

An analyst needs the position of the value “East” inside a region list, rather than the value from a corresponding return column. Which function is designed to return that position?

A. XLOOKUP

B. XMATCH

C. FILTER

D. LAMBDA

Answer: (B)

Q03 · Multiple Choice Questions | 1 practice mark

A manager wants to display only rows where Region is “North” and Sales exceed ■50,000. Which function is most directly suited to return the matching records dynamically?

A. SORT

B. UNIQUE

C. FILTER

D. PROPER

Answer: (C)

Q04 · Multiple Choice Questions | 1 practice mark

A list of customer names contains leading spaces, trailing spaces, and repeated spaces between words. Which function is most directly used to standardise ordinary extra spaces?

A. SUBSTITUTE

B. PROPER

C. TEXT

D. TRIM

Answer: (D)

BBA CIRCLE

Q05 · Multiple Choice Questions | 1 practice mark

A staff member needs to extract characters 4 to 7 from a product identifier, starting at a specified position. Which function is suitable?

A. MID

B. LEFT

C. TEXTJOIN

D. VALUE

Answer: (A)

Q06 · Multiple Choice Questions | 1 practice mark

A worksheet joins first name and last name with a space between them and wants to ignore empty cells. Which function is appropriate?

A. CONCAT

B. TEXTJOIN

C. SUBSTITUTE

D. FIND

Answer: (B)

Q07 · Multiple Choice Questions | 1 practice mark

A workbook must calculate the number of complete years of service between a joining date and a reporting date. Which function is used in the handbook for this date interval?

A. TODAY

B. EOMONTH

C. DATEDIF

D. WORKDAY

Answer: (C)

Q08 · Multiple Choice Questions | 1 practice mark

A project deadline is 10 working days after a start date, excluding weekends and a list of holidays. Which function is appropriate?

A. NETWORKDAYS

B. EOMONTH

C. DATEVALUE

D. WORKDAY

Answer: (D)

Q09 · Multiple Choice Questions | 1 practice mark

A payroll analyst compares salaries that contain one unusually high value. Which measure is generally less affected by that outlier?

A. MEDIAN

B. AVERAGE

C. MAX

D. SUM

Answer: (A)

Q10 · Multiple Choice Questions | 1 practice mark

A manager needs to rank sales figures from largest to smallest, assigning tied values the same rank. Which function is appropriate?

A. RANK.AVG

B. RANK.EQ

C. SMALL

D. PERCENTILE.INC

Answer: (B)

BBA CIRCLE

Q11 · Multiple Choice Questions | 1 practice mark

An Advanced Filter must return records satisfying two conditions in the same criterion row. How are those conditions interpreted?

A. OR

B. Neither AND nor OR

C. AND

D. They are ignored

Answer: (C)

Q12 · Multiple Choice Questions | 1 practice mark

A workbook uses a dropdown to restrict entries in a Department column to approved department names. Which Excel feature is being used?

A. Conditional Formatting

B. Formula Auditing

C. SUBTOTAL

D. Data Validation

Answer: (D)

Q13 · Multiple Choice Questions | 1 practice mark

A PivotTable is being created to summarise sales by Region and calculate total Revenue. Where should Region and Revenue generally be placed?

A. Region in Rows and Revenue in Values

B. Region in Values and Revenue in Filters only

C. Both fields in Columns

D. Both fields in the Filters area

Answer: (A)

Q14 · Multiple Choice Questions | 1 practice mark

A report reader should be able to click a visual control to filter a PivotTable by salesperson. Which PivotTable feature is designed for this?

A. Timeline

B. Slicer

C. Calculated Column

D. Named Range

Answer: (B)

Q15 · Multiple Choice Questions | 1 practice mark

In Power Pivot, a calculated column needs to retrieve a related product category from another table through an established relationship. Which DAX function is used in the handbook example?

A. SUM

B. COUNTROWS

C. RELATED

D. DIVIDE

Answer: (C)

Q16 · Multiple Choice Questions | 1 practice mark

A data analyst imports a raw CSV file, removes blank rows, splits a column, and changes data types. Which Power Query feature records these transformations in sequence?

A. Named Ranges

B. Applied Steps

C. Slide Master

D. Formula Bar

Answer: (B)

BBA CIRCLE

Q17 · Multiple Choice Questions | 1 practice mark

A table has one row per month and separate columns for Jan, Feb, and Mar. The analyst wants Month as a single category column and the monthly values in another column. Which Power Query operation is appropriate?

A. Merge Queries

B. Remove Duplicates

C. Unpivot Columns

D. Group Shapes

Answer: (C)

Q18 · Multiple Choice Questions | 1 practice mark

A chart is intended to show how sales change over ordered months. Which chart type is most appropriate?

A. Pie chart

B. Line chart

C. Bubble chart

D. Stacked bar chart

Answer: (B)

Q19 · Multiple Choice Questions | 1 practice mark

A presentation must be saved as a standard editable PowerPoint file. Which extension is used?

A. .ppsx

B. .pdf

C. .pptx

D. .xlsx

Answer: (C)

Q20 · Multiple Choice Questions | 1 practice mark

A company wants its logo, footer, and standard title formatting to remain consistent across slides. Which PowerPoint feature is most suitable?

A. Slide Master

B. Animation Pane

C. Selection Pane

D. Presenter View

Answer: (A)

Q21 · Multiple Choice Questions | 1 practice mark

A long presentation needs named divisions so the presenter can organise related slides into groups. Which feature should be used?

A. Zoom

B. Sections

C. Action Buttons

D. Notes Pane

Answer: (B)

Q22 · Multiple Choice Questions | 1 practice mark

A user wants to place text in a designated layout area that follows the slide layout's formatting. Which object is intended for this?

A. Freehand ink

B. Floating picture

C. Placeholder

D. Screen recording

Answer: (C)

Q23 · Multiple Choice Questions | 1 practice mark

A presentation includes a button that jumps to a specific slide during the show. Which feature supports this interaction?

A. Format Background

B. Slide Sorter

C. Morph transition

D. Action Button or hyperlink

Answer: (D)

BBA CIRCLE

Q24 · Multiple Choice Questions | 1 practice mark

Which PowerPoint feature controls the visual effect used when moving from one slide to the next?

A. Transition

B. Animation

C. SmartArt

D. Slide Master

Answer: (A)

Q25 · Multiple Choice Questions | 1 practice mark

A presenter wants to see speaker notes and the next slide on their own screen while the audience sees only the current slide. Which mode is designed for this?

A. Reading View

B. Presenter View

C. Outline View

D. Slide Sorter

Answer: (B)

BBA CIRCLE

SECTION B · MULTIPLE SELECTION QUESTIONS

Q26 · Multiple Selection Questions | 1 practice mark

Which statements about XLOOKUP are correct?

A. It can search a lookup array and return a corresponding value from a return array

B. It can include an if_not_found result

C. It always requires the return column to be to the right of the lookup column

D. It can use a selected match mode

Answer: (A, B and D)

Q27 · Multiple Selection Questions | 1 practice mark

Which statements about XMATCH are correct?

A. It returns a relative position within a lookup array

B. It can use different match modes

C. It returns an entire matching table row by default

D. It can use a search mode to control search order

Answer: (A, B and D)

Q28 · Multiple Selection Questions | 1 practice mark

Which functions are used to work with arrays or filter/sort unique results?

A. FILTER

B. SORT

C. UNIQUE

D. DATEDIF

Answer: (A, B and C)

Q29 · Multiple Selection Questions | 1 practice mark

Which statements about LAMBDA are correct?

A. It lets users define a reusable custom function

B. It can use named parameters

C. A defined LAMBDA can be stored through Name Manager for reuse

D. It is used only to format cell colours

Answer: (A, B and C)

Q30 · Multiple Selection Questions | 1 practice mark

Which functions can help clean, standardise, or extract text?

A. TRIM

B. PROPER

C. SUBSTITUTE

D. TEXTBEFORE / TEXTAFTER

Answer: (A, B, C and D)

Q31 · Multiple Selection Questions | 1 practice mark

Which statements about joining and splitting text are correct?

A. TEXTJOIN can combine text using a delimiter

B. TEXTJOIN can be set to ignore empty cells

C. TEXTSPLIT can split text using row or column delimiters

D. CONCAT always removes all empty cells and repeated spaces automatically

Answer: (A, B and C)

Q32 · Multiple Selection Questions | 1 practice mark

Which statements about Excel date and time functions are correct?

A. TODAY returns the current date

B. NOW returns the current date and time

C. DATE can construct a date from year, month, and day components

D. DATEVALUE converts a recognised date text into a date serial value

Answer: (A, B, C and D)

BBA CIRCLE

Q33 · Multiple Selection Questions | 1 practice mark

Which statements about DATEDIF, EDATE, and EOMONTH are correct?

A. DATEDIF can calculate an interval between two dates in specified units

B. EDATE returns a date shifted by a chosen number of months

C. EOMONTH returns the last day of a month a specified number of months away

D. These functions are all designed to count only working days

Answer: (A, B and C)

Q34 · Multiple Selection Questions | 1 practice mark

Which statements about NETWORKDAYS and WORKDAY are correct?

A. NETWORKDAYS counts working days between dates

B. WORKDAY returns a date after a specified number of working days

C. Both can use a holiday list

D. Both count Saturdays and Sundays as normal working days by default

Answer: (A, B and C)

Q35 · Multiple Selection Questions | 1 practice mark

Which statements about text and numeric values are correct?

A. TEXT can format a number as text using a specified format

B. VALUE can convert recognised numeric text into a number

C. A displayed number and a text value containing digits are always interchangeable in calculations

D. Identifiers such as codes may need to remain text to preserve leading zeroes

Answer: (A, B and D)

Q36 · Multiple Selection Questions | 1 practice mark

Which statements about statistical functions in the handbook are correct?

A. AVERAGE calculates the arithmetic mean

B. MEDIAN returns the middle value after ordering

C. MODE.SNGL returns the most frequently occurring value

D. MINIFS and MAXIFS can calculate minimum or maximum values subject to criteria

Answer: (A, B, C and D)

Q37 · Multiple Selection Questions | 1 practice mark

Which statements about ranking and percentile functions are correct?

A. RANK.EQ gives tied values the same rank

B. RANK.AVG averages the ranks for tied values

C. LARGE and SMALL return values at selected positions in an ordered set

D. PERCENTILE.INC estimates a percentile within an inclusive range

Answer: (A, B, C and D)

Q38 · Multiple Selection Questions | 1 practice mark

Which statements about named ranges and flexible references are correct?

A. A named range gives a meaningful name to a cell or range

B. Name Manager can be used to define or edit names

C. INDIRECT can construct a reference from text

D. OFFSET can return a reference shifted from a starting cell or range

Answer: (A, B, C and D)

Q39 · Multiple Selection Questions | 1 practice mark

Which statements about sorting and SUBTOTAL are correct?

A. Sorting can reorder entire records based on a selected field

B. A multi-level sort can use more than one sort key

C. SUBTOTAL can calculate summaries for visible filtered rows

D. Sorting one column alone without expanding the selection is always safe for a table

Answer: (A, B and C)

BBA CIRCLE

Q40 · Multiple Selection Questions | 1 practice mark

Which statements about Advanced Filter criteria are correct?

A. Conditions on the same criteria row are joined by AND

B. Criteria on separate rows can be treated as OR alternatives

C. Formula-based criteria can be used when a more complex condition is required

D. Advanced Filter can return unique records when configured to do so

Answer: (A, B, C and D)

Q41 · Multiple Selection Questions | 1 practice mark

Which statements about data cleaning and validation are correct?

A. COUNTIF or COUNTIFS can help identify repeated values

B. Remove Duplicates should be used after deciding which columns define a duplicate

C. Data Validation can restrict permitted entries

D. A validation rule proves that all existing data in the source list is already correct

Answer: (A, B and C)

Q42 · Multiple Selection Questions | 1 practice mark

Which statements about conditional formatting are correct?

A. It can apply visual formats based on values or formula rules

B. Formula-based rules can use relative or absolute references

C. AND and OR can combine conditions in a rule

D. Conditional formatting permanently changes the underlying cell value

Answer: (A, B and C)

Q43 · Multiple Selection Questions | 1 practice mark

Which statements about Excel pictures, hyperlinks, and checkboxes are correct?

A. A picture can be placed in a cell or as a floating object

B. A hyperlink can connect to a cell, file, slide, or web destination

C. A checkbox can return a TRUE/FALSE state for a tracker

D. A checkbox automatically calculates the percentage of tasks completed without a formula

Answer: (A, B and C)

Q44 · Multiple Selection Questions | 1 practice mark

Which statements about Excel charts are correct?

A. Column and bar charts compare values across categories

B. Line charts are useful for showing trends across ordered time periods

C. Pie charts show parts of a whole

D. Scatter charts can help examine relationships between two numeric variables

Answer: (A, B, C and D)

Q45 · Multiple Selection Questions | 1 practice mark

Which statements about PivotTables are correct?

A. PivotTables summarise data by arranging fields into Rows, Columns, Values, and Filters

B. Value Field Settings controls calculations such as Sum, Count, or Average

C. Grouping can organise dates into months, quarters, or years

D. A PivotTable automatically updates every time its source data changes, without refresh

Answer: (A, B and C)

Q46 · Multiple Selection Questions | 1 practice mark

Which statements about PivotTable reports and dashboards are correct?

A. Slicers provide clickable filtering controls

B. Timelines provide date-oriented filtering when supported

C. Calculated fields can add a calculation to a PivotTable report

D. PivotCharts can be connected to PivotTable results

Answer: (A, B, C and D)

BBA CIRCLE

Q47 · Multiple Selection Questions | 1 practice mark

Which statements about Power Query are correct?

A. Applied Steps records transformations in order

B. Refresh can rerun the query using changed source data

C. Unpivot converts columns into attribute-value rows

D. Add Column by Example can infer a transformation from sample outputs

Answer: (A, B, C and D)

Q48 · Multiple Selection Questions | 1 practice mark

Which statements about the Data Model, Power Pivot, and DAX are correct?

A. A Data Model can connect related tables without physically merging all columns into one flat table

B. Relationships use matching key fields between tables

C. RELATED can retrieve a value from a related table when a valid relationship exists

D. Measures can be reusable calculations evaluated in a PivotTable context

Answer: (A, B, C and D)

Q49 · Multiple Selection Questions | 1 practice mark

Which statements about PowerPoint slide design and organisation are correct?

A. Sections can organise slides into named groups

B. Placeholders follow the slide layout and support consistent positioning

C. Slide Master can control common layouts and formatting

D. Replacing a font can be used to apply a consistent alternative font through a presentation

Answer: (A, B, C and D)

Q50 · Multiple Selection Questions | 1 practice mark

Which statements about PowerPoint visuals, interaction, and delivery are correct?

A. SmartArt can convert structured text into a diagram

B. Linked Excel charts can reflect source workbook updates when the link remains available

C. Action Buttons or hyperlinks can navigate to another slide or destination

D. Transitions control movement between slides, while animations control objects on a slide

Answer: (A, B, C and D)
